

CABLES FOR A MOVING WORLD

The background of the entire page is a blue-tinted, blurred photograph of a busy transit station. People are walking in various directions, and there are overhead signs and structural elements visible. In the foreground, two cables are shown in sharp focus. The cable on the left has a red jacket and a green braided shield. The cable on the right has a black jacket and a silver braided shield. Both cables have their outer jackets stripped back, revealing multiple copper conductors inside.

STANDARDS AND QUALITY SYSTEM

STANDARDS

Cables manufactured based on:

- BS7211** Electric cables. Thermosetting insulated and thermoplastic sheathed cables for voltages up to and including 450/750 V for electric power and lighting and having low emission of smoke and corrosive gases when affected by fire.
- BS 7629** Electric cables. Specification for 300/500 V fire resistant screened cables having low emission of smoke and corrosive gases when affected by fire Multicore and multipair cables.
- BS 7846** Electric cables. Thermosetting insulated, armoured, fire-resistant cables of rated voltage 600/1000 V, having low emission of smoke and corrosive gases when affected by fire.

Fire Performance based on:

- BS EN 50200** Method of test for resistance to fire of unprotected small cables for use in emergency circuits.
- BS EN 50267** Common test methods for cables under fire conditions. Tests on gases evolved during combustion of materials from cables.
- BS EN 60332-1** Tests on electrical and optical cables under fire conditions. Test for a vertical flame propagation for a single insulated wire or cable.
- BS EN 60332-3** Tests on electric and optical fibre cables under fire conditions. Test for vertical flame spread of vertically-mounted bunched wires or cables.
- BS EN 61034** Measurement of smoke density of cables burning under defined conditions.
- BS 6387** Test method for resistance to fire of cables required to maintain circuit integrity under fire conditions.
- BS 8434-2** Methods of test for assessment of the fire integrity of electric cables. Test for unprotected small cables for use in emergency circuits. (BS EN 50200 with a 930° flame and with water spray).
- BS 8491** Method for assessment of fire integrity of large diameter power cables for use as components for smoke and heat control systems and certain other active fire safety systems.

Applicable Codes of Practice:

- BS 5266-1** Emergency lighting Code of practice for the emergency escape lighting of premises.
- BS 5839-1** Fire detection and fire alarm systems for buildings Code of practice for design, installation, commissioning and maintenance of systems in non-domestic premises.
- BS 7346-7** Components for smoke and heat control systems Code of practice on functional recommendations and calculation methods for smoke and heat control systems for covered car parks.
- BS 8519:2010** Code of practice Selection and installation of fire-resistant power and control cable systems for life safety and fire-fighting applications.
- BS 9999:2008** Fire safety code of practice for the design, management and use of buildings.

STANDARDS AND QUALITY SYSTEM

QUALITY SYSTEM

Tratos aim to work closely with customers to find better, more environmentally friendly solutions to their challenges.

We are committed to our vision and strategy to serve all our internal and external customers by providing high quality services and products.

Tratos is an established industry leader in the design, manufacture and supply of cables and products and to maintain this leading position we are committed at every level to providing our customers with quality services and products at a competitive price. As a commercial enterprise we are aware of the importance of satisfying our customers and of the financial impact of which nonconformities may have on our profitability. For these reasons we are committed to complying with all customer requirements and specifications both legal and statutory requirements. Our Quality Management System has been audited and approved by two independent, Internationally recognized and accepted authorities:

BASEC (UK) and AENOR-IQNET (E), in accordance to ISO 9001:2000 covering the production, purchasing of raw materials design and final test including various document types. The Tratos Quality Management system is under frequent regular surveillance by inspectors working for the Certification Authorities.

ENVIRONMENTAL SYSTEM

Our Environmental Management System has been audited and approved by two independent, Internationally recognized and accepted authorities:

BASEC (UK) and AENOR-IQNET (E), in accordance to ISO 14001:2000 covering the production, purchasing of raw materials design and final test including various document types. The Tratos Quality Management system is under frequent regular surveillance by inspectors working for the Certification Authorities.

STANDARDS AND QUALITY SYSTEM

REACH, WEEE & ROHS

Tratos is fully compliant with the **REACH**. This is a European Union regulation concerning the **Registration, Evaluation, Authorisation and restriction of Chemicals**. It came into force on 1st June 2007 and replaced a number of European Directives and Regulations with a single system. REACH applies to substances manufactured or imported into the EU in quantities of 1 tonne or more per year. Generally, it applies to all individual chemical substances on their own, in preparations or in articles. To summarise, REACH makes the cable industry directly responsible for assessing and managing the risks posed by chemicals and providing safety information to their users.

Tratos fully subscribes to The **Waste Electrical and Electronic Equipment Directive (WEEE Directive)**, introduced into UK law in January 2007 by the Waste Electronic and Electrical Equipment Regulations 2006. The WEEE Directive aims to reduce the amount of electrical and electronic equipment being produced and to encourage everyone to reuse, recycle and recover it. The WEEE Directive also aims to improve the environmental performance of businesses that manufacture, supply, use, recycle and recover electrical and electronic equipment. TRATOS has enlisted the services of the UK's leading producer compliance scheme, Valpak, whom manage our recycling obligations and also ensure our compliance to the WEEE Regulations and the Waste Batteries and Accumulators Regulations.

Tratos is fully compliant with the **Restriction of Hazardous Substances (RoHS) Regulations**. These Regulations implement EU Directive 2002/95 which bans the placing on the EU market of new electrical and electronic equipment containing more than agreed levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants. Tratos fully understands the requirements of the RoHS Directive and ensures that our products, and their components, comply.

APPROVALS

Firesafe cables made by Tratos have been tested and certified by the following Approval Organisations:

London Underground Registration
No. 1738
Authorised For Use

CORPORATE SOCIAL RESPONSABILITY

Tratos adopts a Code of Ethics which adheres to the United Nations Global Compact on human rights, labour standards, protection of the environment and anti corruption measures.

Under this self regulatory code, Tratos will carry out initiatives in the environmental and social fields with special reference to environmental policies and social policies regarding child labour, compulsory labour, health and security, freedom of association and the right to collective bargaining, discrimination, disciplinary procedures, working hours and wages.

LOW SMOKE ZERO HALOGEN (LSZH) CABLES HAVING ENHANCED CIRCUIT INTEGRITY WHEN EXPOSED TO FIRE - BASED ON BS7211

TRATOS FIRESAFE-TW100® - 450/750V

Firesafe TW100 is designed for installations where a fire situation may pose a hazard and the maintenance of circuit integrity is a requirement. Firesafe TW100 is suitable for installations in onerous conditions where the cable is mechanically protected in metal conduit or trunking. Applications include public buildings, schools, hospitals, department stores, cinemas, hotels, theatres, computer centres and similar applications where "standard" grade cable is specified for use in the applicable Code of Practice.

FEATURES AND PERFORMANCES

CONSTRUCTION

- **Conductor:** stranded plain annealed copper class 1 or class 2 conductor
- **Insulation:** mica-glass fire resistant tape covered by an extruded layer of cross-linked, LSZH insulating compound
- **Standard Colours:** red, black, blue, yellow, brown, green/yellow (other colours on request)
- **Identification of Core:** by colour
- **Marking:** TW100 +TRATOS+ BASEC BS7629-1 BS6387 CWZ BS5839 cross section LOT/YEAR -METRE MARKING - "CE"

STANDARDS

- BS 7211 Manufacturing standard with an additional mica-glass fire resistant tape.
- BS 6387; Categories C, W & Z (when applied to a single cable)
- IEC 60331; with the flame temperature increased to 950 oC
- BS EN 50200: when installed in screwed steel conduit
- BS EN 50200 Annex E: when installed in screwed steel conduit
- BS EN 60332-1 and BS EN 60332-3; Flame propagation
- BS EN 50267; Acid gas emission
- BS EN 61034; Smoke emission

CODES OF PRACTICE

- BS 5266 Emergency lighting cables, standard and enhanced, when enclosed in screwed steel conduit

LOW SMOKE ZERO HALOGEN (LSZH) CABLES HAVING STANDARD CIRCUIT INTEGRITY WHEN EXPOSED TO FIRE - BASED ON BS7629

TRATOS FIRESAFE-TW950s® - 300/500 V

Firesafe TW950s is designed for installations where a fire situation may pose a hazard and the maintenance of circuit integrity is a requirement. Applications include public buildings, schools, hospitals, department stores, cinemas, hotels, theatres, computer centres and similar applications where "standard" grade cable is specified for use in the applicable Code of Practice.

FEATURES AND PERFORMANCES

CONSTRUCTION

- **Conductor:** solid or stranded plain annealed copper class 1 or class 2 conductor
- **Insulation:** extruded silicone rubber
- **Electrostatic Screen:** laminated aluminium foil in direct contact with a tinned annealed copper drain wire
- **Sheath:** thermoplastic LSZH sheathing compound
- **Standard Colours:** red or white
- **Identification of Core**
 - 2 core + bare earth: Brown, Blue
 - 3 core + bare earth: Brown, Black, Grey
 - 4 core + bare earth: Brown, Blue, Black, Grey

TRATOS FIRESAFE®

LOW SMOKE ZERO HALOGEN (LSZH) CABLES HAVING ENHANCED CIRCUIT INTEGRITY WHEN EXPOSED TO FIRE

TRATOS FIRESAFE-OPTI® - Fibre Optics

Firesafe OPTI has been designed for use in areas where optical fibre cables are required to operate in the event of a fire. For use in railway and highways tunnels, mass transit underground systems, metro lines, ducts and public buildings.

FEATURES AND PERFORMANCES

CONSTRUCTION

- **Fibre:** 62.5/125 multimode fibres
- **Tube:** jelly filled loose tube
- **Tape:** Fire Resistant Wrapping
- **Inner Sheath:** polyethylene
- **Strength Member:** aramidic
- **Tape:** corrugated steel
- **Outer Sheath:** LSZH
- **Standard Colour:** violet (more colors are available upon request)

STANDARDS

- CEI IEC 60331-11 Ed. 1999 equivalent CEI 20-36/1-1 Ed. 1 2003-03: Test for electric cables under re conditions Part 11 apparatus fire alone at flame temperatures of at least 750°C.
- CEI OEC 60331-25 Ed. 1999 equivalent CEI 20-36/2-5 Ed. 1 2002-03: Test for electrical cables under fire conditions – circuits integrity part 25 procedures and requirements optical bre cables.

VENDOR APPROVAL SYSTEM
